John,

I think the record will show that my communications with EPA have helped, not hindered, the correct handling and remediation of the Arkwood site, in fulfillment of US law and EPA mission.

EPA R6 staff (Gloria Moran & Don Williams at a minimum) have confirmed this in writing.

Particularly, I have helped move Arkwood toward reuse and delisting; by contrast, Jean Mescher stated in writing to me on December 7, 2005 that "**McKesson's incentive is to ensure that this property is 'mothballed' indefinitely**" and McKesson continues to work diligently to ensure that will be the case, including by filing this lawsuit against my 83-year old father.

As you recall, the longtime Arkwood RPM Shawn Ghose had a relationship with Jean Mescher such that he felt comfortable emailing her on June 21, 2011 from his EPA account:

"Jean : Please delete this after reading." (Please see attached for ease of reference.)

Shawn Ghose had ample reason to want to cover his tracks.

Without repeating myself here, I think I have already demonstrated that Shawn Ghose mishandled the Arkwood project badly, allowing himself to be manipulated by Jean Mescher to the detriment of Arkwood remediation and the public interest.

Can you give me some support in this? It would be bad for Arkwood and the public interest if McKesson succeeds in slapping me with a gag order.

Curt
